The biggest challenge in I.T is to get good quality work. Software and Design Consultant, has a unique approach in finding the right resource for your digital transformation project. Software and Design Consultant promises in creating the right solution to reach your business goals.

### Values:

1. **Solving Micro Challenges:** We strongly believe that Information Technology should track micro challenges of our society and business world.
2. **Technology Consulting:** We accurately monitor and optimize the use of right technology based on the needs of the service or product delivered.
3. **Human Resources:** We believe that every person has the best innate ability, and if rightly tapped, their skills can do wonders in this world.
4. **Responsibility:** We see social responsibility as a natural part of every Entrepreneur. Companies should create ideas with their services and products for solving the hardest challenges which society and environment faces every day.
