- INBGA is a major exporter of plant materials, fertilizers, chemicals, equipment for construction site & maintenance unit for the hospitality and other sectors.
- Experience the fresh, aromatic and healthiest plant materials for project renovation from 0 to 100% compilation.
- From the southern part of Chennai, INBGA has been efficiently working with liaison offices in the strategic trade hubs of various continents- middle east Asia, South Asia,

Africa, and South Asia Pacific. And countries such as Republic of Maldives, Dubai, Singapore, Papua New Guinea, Qatar Mauritius and Seychelles island.

Sustainable Landscaping

Sustainable landscaping is INBGA's priority to preserve natural resources like water, energy and soil. Our system is designed in a way that it uses organic methods in all stages of development. We consider garden as a part of the larger ecosystem by using integrated pest management methods, and green building techniques.

Commercial landscaping

Love and desire for appealing outdoor space are on the rise in today's business world. Commercial landscapes have much deeper benefits than just beautification- Commercial green care elevates productivity by giving a calm and fresh surrounding for people working in and around an office or industrial space. A fresh exotic landscape makes customers and clients understand that they will get the same amount of care as given to your workspace.

Landscaping Maintenance

That's amazing landscape from INBGA, resting at your home your office! The next step is a plan about its maintenance and care by providing regular maintenance which keeps your landscape healthy, clean, safe and attractive.

Softscape

The abode of softscapes comprises of grass, trees, flowers, soil, shrubs, etc. Softscapes gives your numerous varieties of plants with captivating foliage and flowers that are appealing to the public and to the pollinators.

Hardscape

A garden doesn't just rise with softscapes such as plants and greens. It takes the support of hardscapes such as stones, rocks, patios and driveways. Some of the hardscape elements are pathways, lights fountain, signs, benches, sculptures and much more.

Water feature

Let the melody a soft flowing water add enchanting vibes to your garden. A water feature is an indoor or outdoor décor that incorporates water. INBGA's expert landscaping designers can suggest you choose from a variety of options such as fountainscapes, pondless waterfalls, ecosystem ponds and advanced ponds.

Irrigation

INBGA ensures that your splendid lush greenery stays fresh and blooming by means of irrigation, i.e. delivering water to growing plants. Drip irrigation, Irrigation Panel, Sprinkler, Pop up the system, Pipe initialization are some of the methods. We have an eco-friendly system of irrigation that saves water.

Garden lighting

Lighting systems allow you to enjoy the aesthetic beauty of your garden should even after sunset. The proper lighting gives a comfortable ambience to your garden. It time to rediscover your garden with our amazing range of lighting- garden spike lights, garden bollard lights, outdoor spotlights, garden wall lights, outdoor floodlights, in-ground lights, deck lighting, led candle lights, etc.

Garden Furniture

Garden furniture gives you a place to sit at peace and enjoy your amazing garden. It is also called patio furniture. INBGA takes utmost care in designing it for outdoor use in a way that it

withstands the effect of all types of weather conditions and built with rust-free materials like aluminium.

There are a variety of artistic designs that add an extra glory to the garden and gives you a space for chats and meetings.

Vertical garden

Isn't it so cool to be in a space with vertically oriented high-density plantings? Vertical gardening, use structures or columnar trees to create garden rooms. Vertical gardens are grown on walls, windows of houses, offices etc. where they don't have a garden space outside their place.

Trellises, bound to the grounds or large containers allow you to grow vines, flowers, and even vegetables in a vertical garden, with minimal space than traditional gardening requirements.

Horticulture

If you are looking for small-scale plant cultivation in enclosed as well as outdoor spaces, then INBGA helps you to do it, by Horticulture.

This includes cultivation, plant propagation, breeding of plants, production of crops, plant physiology as well as biochemistry and genetic engineering. The plants looked at are mainly vegetables, flowers, fruits and nuts.

Tropical garden

The tropical garden is an amazing arrangement of dense vegetation that gives you a fresh mix of fragrance that wafts through the summer air. INBGA promises to bring you the real experience of a tropical island in Asia or the South Pacific, at your own resort-style gardens that resemble the lush surrounds of five-star resorts you have ever dreamt before.

Our gardens are visually alluring with colourful vistas, linear pathways and focal points create the structure of the garden and help link indoor rooms with outdoor spaces.

Interior Garden

Enthrall and awe your guests with interior green spaces. Your residential homes, a business location like an office building or restaurant, or any other enclosed area will get some fresh natural oxygen.

Plants, vegetables, etc. can be grown in all seasons. This improves your health, air quality and lessens background noise. Our experts will guide to create aesthetically pleasing interior spaces, an epitome of finely customized garden designs.

Terrace Garden

Go organic with INBGA's terrace gardens. Vegetables, greens, fruits and flowers are grown on your terrace, balcony, windowsill or roofs of buildings. Use the product for your own consumption and stay healthy with organic farming. Also creates a platform to sell the product and make a profit.

Its amazing benefits are reduced indoor temperature, sound pollution and air conditioning cost. Acts as thermal insulators. It is conducive to a routine of physical exercise, clean air and being close to nature. Increases the amount of oxygen in the air and act as a habitat for city-weary birds.

Zen garden

Peace and tranquility is the symbol of Zen garden. These are carefully controlled settings of raked sand or rocks and precisely clipped shrubs. Zen gardens are used for meditation and calmness.

INBGA has meticulously observed the Japanese Zen gardens design styles and trained their landscapers. These gardens are used as a way to try to reach enlightenment. It improves your focus and develops a sense of well-being. Even if you not fond of meditation and Zen, rock gardens with plants can still offer a relaxing and beautiful space in the yard.

Rock Garden

Rock gardens were created from the inspiration taken from the view of a mountaintop where you have a silty rocky landscape and very distinctive small and compact plants. INBGA's rock garden style plants are small and compact with really beautiful floral displays, and combining them with a well-draining soil and often stones or rocks to complement the beauty of the plants
